

## Career and Life Planning Team

The Career and Life Planning Team serves Queen's College as a function team. Our missions are threefold: exploring careers and further education, formulating career and life planning strategies and promoting life planning awareness. To achieve the above goals, our team has made every endeavour to organise a multitude of activities.

Firstly, our Counsellors edit two school-based Careers Magazines every year, namely Decision and Divination, which are freely distributed to all S3 and S6 students. For Decision, we provide S3 students and parents with detailed and objective information regarding DSE elective choices. As for Divination, it comprises the updated JUPAS information and a comprehensive list of multifaceted pathways available to S6 students.

In line with the two magazines are an array of talks. We organised overseas university talks which provide useful information about studying abroad. In addition, we invited speakers from CUHK and PolyU in December 2020. They shared the curriculums and entrance requirements of various local programmes with our S5 and S6 students.

Apart from talks, we also organised an online mock interview (eMMI) for students who plan to study medicine in local universities. This year, we are thankful to have a raft of old boys who are working in the medical field as interviewers. It is beyond questions that students can gain valuable experience through participating in this programme.

Although the shadow of the pandemic is still falling across the world, as an energetic and responsible team, we will persist with our plans against all odds. More activities are going to be held soon, so don't miss out on them!
