

Geography Society 地理學會

The Geography Society is an academic club that gathers students from all forms who are interested in Geography. We discuss different topics of Geography such as weather and climate, city planning, industry etc. Our topic this school year is Tree ecosystem. We mainly discuss about different sorts of trees and special species of trees in QC. QC has a large variety of trees which worth observing.

This year, we wrote passages about special kinds of trees and the ecosystem on our social media, Facebook and Instagram every month to introduce them to students. In addition, we also held an online Q&A competition for S1 students. Questions were based on the passages we had written on our social media websites. The aim of the activity was to allow students to gain more knowledge on special trees and the ecosystem.

In order to promote environmental conservation and let S1 and S2 students know more about trees in QC, we organised an online tree search activity for them. We shot videos of trees in QC during Chinese New Year Holiday using an aerial camera and introduced them to students during the activity.

地理學會是一個學術學會。集合各級愛好地理的同學一起研究不同的地理專題。例如天氣、氣候以及城市規劃等等。

今年，我們的主題是樹木生態。顧名思義，我們今年的主要探討項目就是有關樹木。尤其學校裏有各式各樣的花草樹木，很值得我們觀察和探討。

今年，我們每個月都在社交媒體 Facebook 和 Instagram 上刊登一篇專題文章。其中向同學介紹一些特別嘅樹木，以及樹木管理等。我們亦舉辦了一些呼應主題的活動。上學期，我們為中一同學舉辦了一個有關樹木生態的問答比賽，反應非常踴躍。比賽以網上形式舉行，問題環繞着我們在社交媒體上寫的文章，讓同學對大自然認識更多。

而在剛剛考完試的二月下旬，我們聯合環保教育組在 Green week 以網上形式舉辦樹木遊蹤活動。農曆新年假期間於學校錄製樹木短片，向同學介紹學校的樹木。
