“BIOLOGY IS THE MOST POWERFUL TECHNOLOGY EVER CREATED”

Introduction

Our club shares interesting Biology knowledge with students which sparks their enthusiasm for Biology.

Orientation Day

We organised our first virtual O-day this year due to the pandemic situation. It was a great success as our committee discussed many amazing biological facts related to food and nutrition with our members. We shared a great moment with the active response from the members.

Rat Dissection Workshop

Every year, we have rat dissection workshops as our club activities and on the Open Days. During the virtual Open Days this year, we will also have the same event to show the anatomy of the rat related to human anatomy. Stay tuned!

Publication

Our biology magazine, Biowave, will be published with the topic “Human Physiology X Plants”. This is also fascinating for more interesting information about human and plant physiology.

Acknowledgement

We would like to take this opportunity to express our gratitude to our teacher advisors Ms Lau and Ms Chik, as well as the hard work of all our committee members. We would not have the success this year without any of them. Besides, the unfailing important from all of you is the utmost important. Thank you all!
